

AMADA PRESS BRAKE RECONDITIONING PROGRAM

At Manufacturing Solutions, one of our goals is to see older, used machinery remain Productive, Profitable and Presentable. We are pleased to announce our Amada Press Brake Reconditioning Program.

When you purchase a Reconditioned Amada RG or FBD Series press brake from us, our expectations are aligned with yours. Your machine will:

- ✓ Be Fully Functional and Operational
- ✓ Turn Out Accurate Parts Consistently
- ✓ Look Like a New Machine

A partial list of items that we address:

- Hydraulics - Full inspection. Any worn hoses or fitting are replaced.
- Pneumatic System - Air regulator and external air lines are replaced.
- Control - Install new mylar panel (if EXII) and re-plated back plate.
- Backgauge - All finger stops are rebuilt/reconditioned.
- External control/cables - Repair/replace worn dogs, limit switches, micro switches, etc.
- Punch Holders and Die Rail Clamps - Full inspection. Repair/replaced if needed.
- Cosmetics - Clean and paint machine. New decals.
